FRA MEMBERSHIP 2011

THANK YOU to all who have chosen to support your Foothills Community Association. One hundred twenty seven households are on the membership list for 2010! Currently there are nine families that have paid their 2011 dues. The fiscal year ends on December 31, dues for 2011 are payable now.

The \$20 yearly dues serves as tangible evidence of your caring and interest in preserving the rural lifestyle of the Foothills area. With paid memberships, the Association is able to sponsor free community events, maintain the Community Center building and grounds, and to publish and distribute this newsletter. Your membership support is both needed and appreciated! Please check the address label; if there is 2010 or no date after your name, please take a moment to send in your 2011 dues.

The membership form is found on the upper portion of the last page of each newsletter. Return either the half or full page to the FRA address listed there and thank you for supporting our Foothills Rural Community!

YOU HAVE WHAT IT TAKES

Don't let the title of FRA Editor intimidate you and keep you from helping to continue our legacy as a community that truly cares about our neighbors. Being the editor does take some time and effort but we only publish the newsletter 2 to 4 times a year. Computer skills and access to the internet are also necessary, but it is not a solo task! Information for articles comes out of the board meetings, board and FRA members write and contribute articles. Jeanne at BCi Creative, takes the hardest part for me – that of formatting the newsletter! I just email edited articles to her and poof! Emailed back to me is a newsletter ready for my approval! After that, BCi electronically sends the print ready newsletter to the printer (Griffin Publishing), which not only prints the newsletters but takes them to the post office business center for mailing! How simple is that? Additionally BCi Creative sends the newsletter to our website, www.ruralspokane.com where webmaster David Fisher posts it. Interested? Give me a call at 928-6610 or send an email to rfkrenkel@ptera.net. I will be happy to answer any questions. I will give the next editor, training, support and contribute articles. ~Faye Krenkel

HOLLY LANE TREE FARM

Holly Lane Tree Farm is a U-cut Christmas tree farm planted in 2001 by Mike and Paula Yackley. They plan to open for Christmas tree cutting in 2011 or 2012. Mike stated, "Our plan is to make choosing a Christmas tree a fun, family event. Our goal is to become a part of a family's tradition of finding that special tree. Currently the Yackley's offer beautifully hand-tied and decorated evergreen wreaths for this holiday season. "I wanted to make a unique Christmas wreath," Paula said. "Something different from what you can find at the big box stores but still be affordable. I think we have done that."

Visit www.hollylanetreefarm.com to view the many available wreaths and to learn more about Holly Lane Tree Farm.

CHILI FEED/HARVEST PARTY

Once again the annual combined FRA Chili Feed and Foothills Community Church Harvest Party provided a fun family evening! There were games, candy, hay rides, food and socializing; a little bit of something for everyone. Approximately 240 people enjoyed one or more servings of homemade chili provided by the FRA Board. There were four chili varieties: regular (family spicy), jalapeno hot, wild turkey white chili and chili with venison. Chef Cheryl provided cooking and mixing directions to her kitchen staff – very well done Cheryl!

The Community Center was decorated inside and out by Ashley and Rob – with a special award winning carved pumpkin donated by Ben. Marc and Amanda once again provided the hay rides. Generous donors gave \$213 towards the annual scholarship fund. **Thank you!**

BIRDS OF THE FOOTHILLS

Wintering Birds

by Ron Dexter (Reprinted from a 1996 FRA newsletter)

There are a number of birds that visit the Foothills in the winter months, such as the Pine Grosbeak, Bald Eagle, Stellar Jay, Merlin and the Bohemian Waxwings. This article features two of the most commonly seen visitors: the Northern Shrike and the Rough-Legged Hawk. Northern Shrike. This little bird is only ten inches long, but holds its own among many larger birds. It is gray, white and black, with a heavy black eye line. It has a hooked bill for tearing food apart. Its food consists of rodents, lizards, and large insects as well as small birds. The

Northern Shrike hunts in open fields. These little birds migrate 500 to 1,000 miles; all the way from Alaska, the Yukon, Northwest Territories, Northern Canada and parts of the Arctic to the Foothills area. They arrive here in mid-October and head back north in mid-April. The Shrike is a songbird with many beautiful rambling songs. It sings in the fall when it first arrives and sings in the spring as if calling for a mate before starting its trip back north. You will see this bird on power lines along the roads or hovering in one spot over fields while watching the movement of its prey in the grass before diving to grab it with its bill. The Shrike has a typical songbird feet which are only strong enough for perching, therefore, it must find some other way to hold the food while tearing small pieces off for a meal. The Shrike finds a thorn in a Hawthorn tree or a barb on a fence which it uses to impale mice. It may also wedge the food into a tight fork of two branches.

Don't confuse the Shrike with the American Kestrel which is a little larger and very colorful. The kestrel is a falcon that hunts in the same manner as the Shrike. Rough-Legged Hawk. The name comes from the feathers on the leg which runs down to the talons. This large hawk and the Shrike compete for the same space and rodents both here and up north. Rough-legs generally arrive about a week or two after the shrikes. Rough-leg hawks migrate in large loose flocks. These hawks are the same size as our local Red-tail hawks. The Rough-leg hawk is white, black and brown with a white upper tail that has a heavy black band near the end. Their neck is white; the breast is black. A rectangular black wrist stands out on the underside of white wings as they fly; their white head is broken by a black eye line and whisker mark. They hunt just like the shrikes – from poles, overhead wires, and tree tops. They also hover in one spot just like the Shrikes. Use your bird books and binoculars to study these and other wintering birds.
